Status Update

For the past two weeks we were working on data collection and database building. First of all, we visited a few finance web pages to find data. After that, we put data into csv files and create database in SQLite3. We plan to do some deeper analysis in next week. Right now we have 6 data files which contains data from NASDAQ Composite, Dow Jones Industrial Average, S&P 500, in year 2015 and year 2016. We were learning some text mining and data mining, and hopefully we can use some data mining in this project.
